If the team is less than a full commandery front the captain goes to the position three paces in front of the right file (if right dress) or the left file (if left dress) and faces front. He then moves to a different position if necessary for the next command. If the alignment is by platoons and the platoon leaders are checking the alignment, after Front they move to their position two paces in front of the center of their respective platoon and face front.

Revised January 2008
Wheelings are of two kinds; on fixed or moving pivots. In all wheels, the guide on the marching flank keeps the pivot constantly in view (Paragraph 18); to this end, the Knight next to him keeps the line of his shoulders a little to the rear, but in the same direction. When platoons or larger subdivisions wheel, a slight uniform bow of the line to the rear is permissible.

ADDENDUM  (Par. 80)

In the execution of all wheels, whether on fixed pivots or moving pivots, head and eyes are turned simultaneously with the first step of the wheel. Head and eyes are turned back to the front simultaneously with the first step following the completion of the wheel. When the wheel terminates with a halt, head and eyes are turned simultaneously with the last movement of the halt; that is, as the feet are brought together (Paragraph 67).

Head Movements Following Successive Formulations into Line
(Examples: Paragraphs 205, 207, 241, 303 and 304)

In successive formations into line, each element halts and dresses successively upon arriving in line. The Knights of each element complete the halt in unison with head and eyes straight to the front. On the first count after the halt is completed, head and eyes are turned in unison to dress. A count is one-half of one second.

Added March 2005
THE FIXED PIVOT IS USED IN WHEELING FROM LINE INTO COLUMN, OR FROM COLUMN INTO LINE.

The pivot Knight marks time in place, turning to conform to the marching flank.

The Knight on the marching flank takes the full step and looks toward the pivot. All keep touch of elbows toward the pivot, head and eyes turned toward the marching flank, regulating the length of step accordingly.

Lengths Of Steps Are Approximate
WHEELING ON A MOVING PIVOT (Par. 82)

THE MOVING PIVOT IS USED IN CHANGING DIRECTION OF COLUMN IN MARCHING, AND IN SOME SUCCESSIVE FORMATIONS.

The pivot Knight takes a short step, thus gaining ground forward, describing a circle the radius of which is always 30 inches, regulating the length of step to correspond to the marching flank. The Knight on the marching flank takes the full step and looks toward the pivot. All keep touch of elbows toward the pivot, head and eyes turned toward the marching flank, regulating the length of step accordingly.
